Nurses and Midwives Association of Slovenia is the only professional organization of nurses and midwives, who represent the largest professional group of health care professionals. Its main purposes are:

- to unite nurses, midwives and health technicians from the entire country and to advocate their professional, social and economic interests;
- to develop and promote modern nursing care; and
- to provide quality nursing care for all people.

Task of the Association:

- coordinating the profession;
- preparing legislation which regulates the field;
- representing political positions to enable and ensure professional development of nursing, establishing appropriate status for nursing care providers in the society;
- monitoring and participating in education of nurses;
- developing nursing research.

The main guiding principles of work for nurses and health technicians are listed in the Ethical Code for Nurses, Health Technicians and Midwives of Slovenia.
